BASANT FLOORINGS
PRIVATE LTD.

Egg shape drain

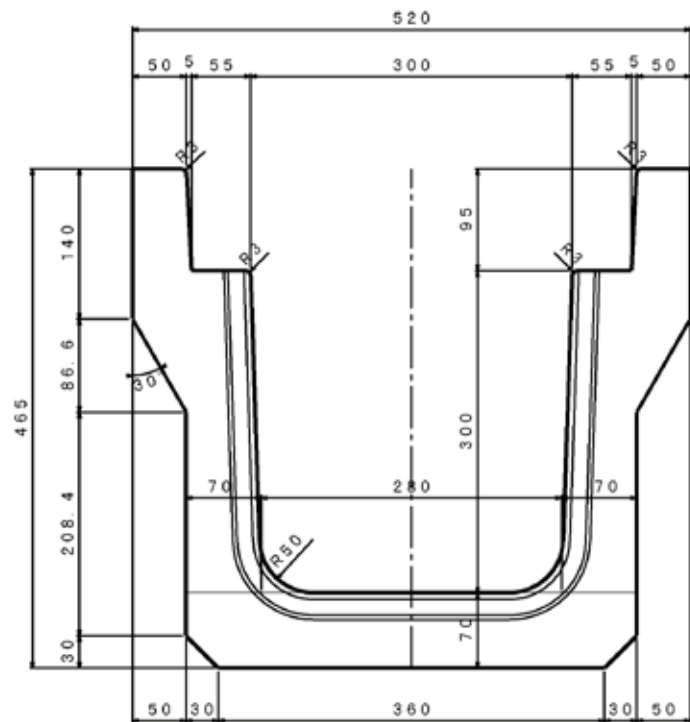

The Egg-Shaped drains is one of the most commonly used products throughout Japan. The Egg-Shape is considered the best shape for water flow to let waste and debris in drains flow evenly with minimal amount of rainfall. The Egg-Shaped drains have developed into many types. An example of the product is "Slit Type". The design has a slit on top slab of the products to allow water for good drainage.

Egg -Shape Drain shall be assembled with rubber seal in blocks and locked with clamp so that usage of cement is totally avoided, Egg-Shape Drain turns with 90° angle as shown in the picture.

U shape drain with shoulder

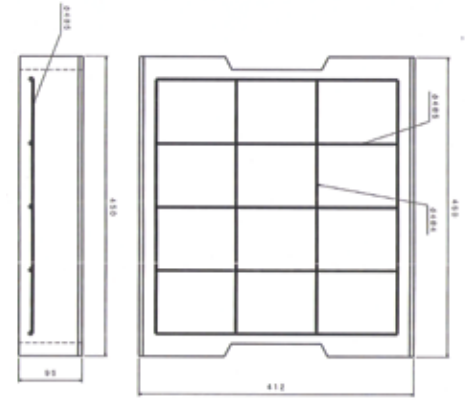

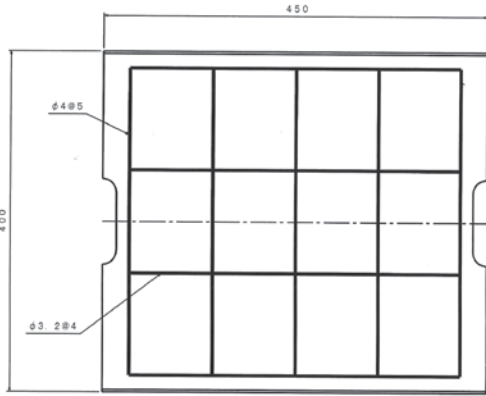

"U" Shape Drain has shoulder to fit the cover on the top.
 For water flow groove is provided in between each drain.
 The moulds used for these products are from "Toyota Khokhi", Japan.
