RETAINING WALLS

FENCE SYSTEMS

RETAINING WALLS

- Allan Block Segmental Retaining Walls, are concrete masonry blocks that are modular and interlocking for ease of use.
- Simply stack the mortarless blocks together, and create a maintenance-free retaining wall that will add usable land, fix a grading or slope issue, and solve many other site problems.
- These blocks can be used to create small landscaping and garden elements as well as very tall retaining walls for highways and bridges.

FENCE SYSTEMS

- AB Fence is a mortarless concrete fence system that uses maintenance free interlocking blocks to create an attractive and effective solution for sound abatement, security, privacy and more.
- The system can incorporate curves and corners with ease and use different colored/textured blocks to create beautiful patterned fences.
- This concrete fence uses posts and panels to construct beautiful and durable concrete structures that will stand the test of time.
- The AB Fence Systems have a split-faced look on one side and striated look on the other side.
