ART LINE™ Grass pavers are a unique, innovative and beautiful product from Basant Betons®. At the outset, the first look at this ART LINE™ shows beautiful straight lines. Unlike the conventional grass pavers, it's easy to walk on and is fire brigade accessible. Ideal for use for water recharge to the ground enabling water harvesting. Grass grows with ease in open areas creating elegant landscapes.

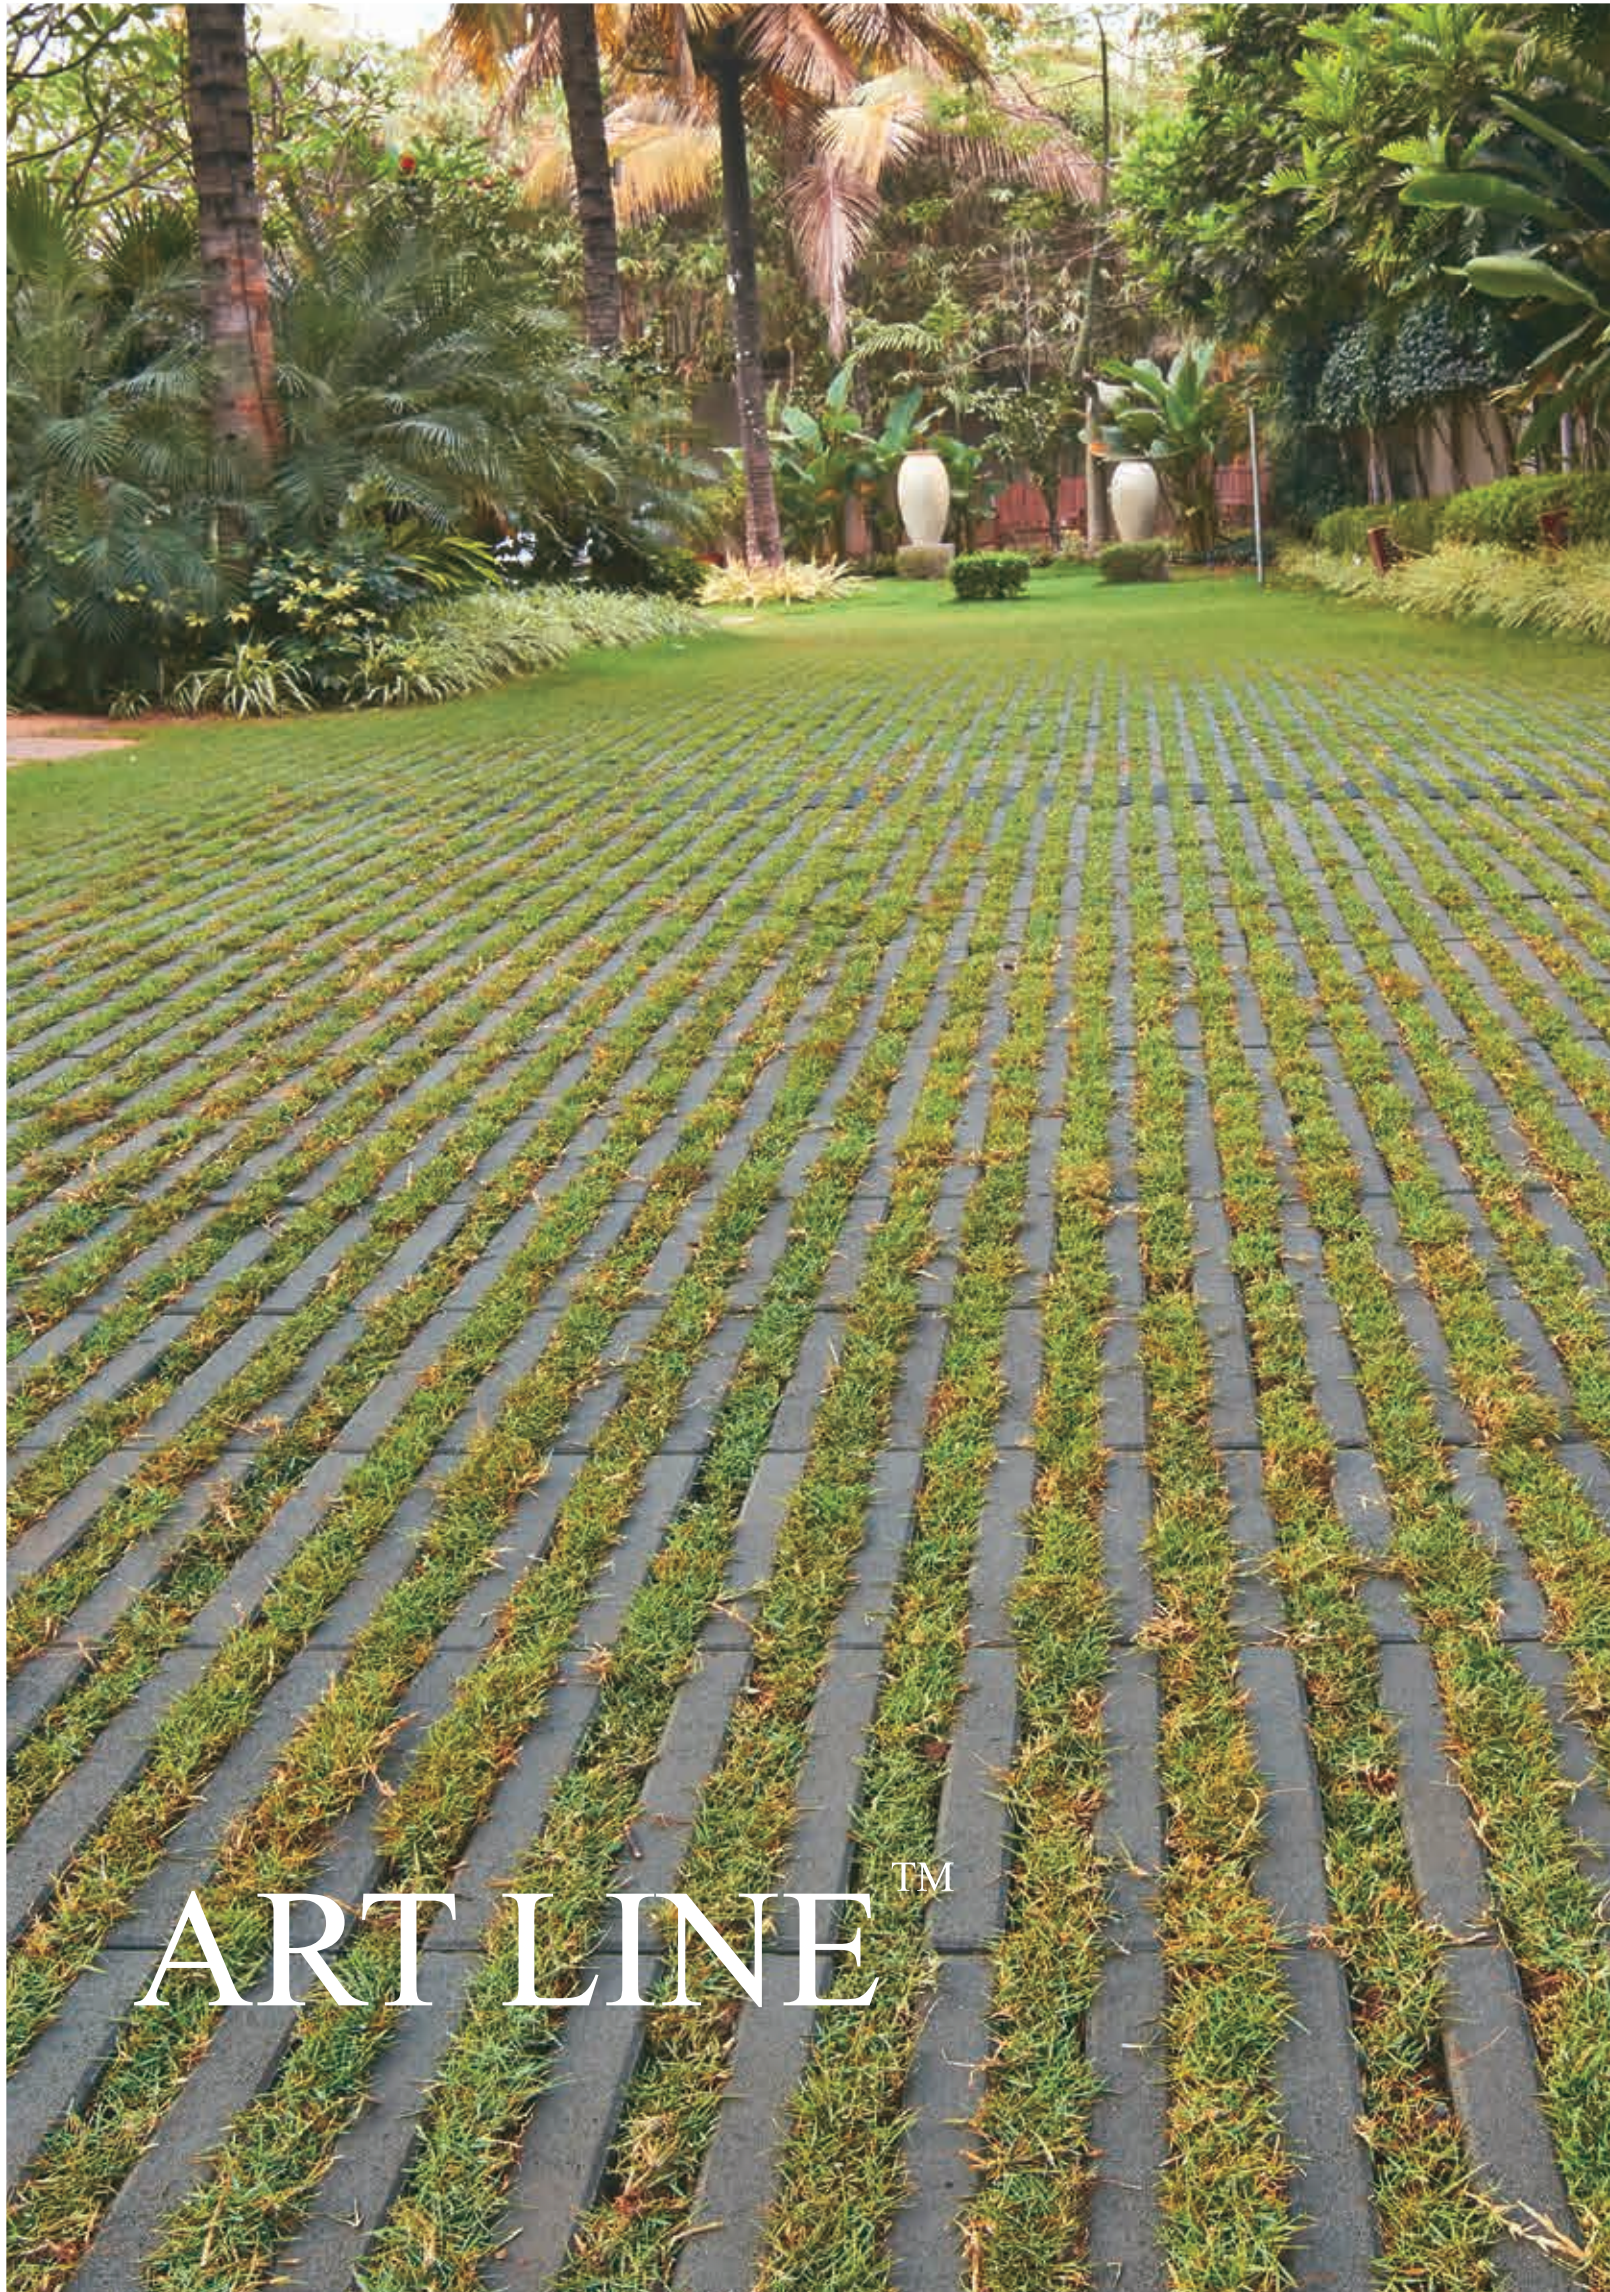

DIMENSION: 300 X 300 X 120 MM | SURFACE DRAINAGE – 28.6%

ART LINETM

It is one of the most innovative grass paver by Basant Betons®. This can be provided with different earthen-colour-blends or the colours which are indicated in the pictures.

It gives landscaping designers more opportunities to create distinct areas with aesthetic appeal. When grass is grown in between, it gives a unique appearance of large pebbles randomly laid. It does bring in exciting thoughts of sunny beaches. These grass pavers are ideal for those who prefer eco- friendly landscapes, where there is a requirement of high degree of water charge (permeability) in the paved area.

DIMENSION: 500 X 330 X 80 MM | SURFACE DRAINAGE: 25%
